

Handling Tips

1. If your exhibit fabric has a zipper, please keep zipper closed for storage.
2. Wrinkles can be removed with cool iron or fabric steamer.
3. Fabric should NOT be stored when damp or wet. Store in cool, dry area.
4. For storing graphics please remove from plastic packaging that was provided and keep fabric in cool/dry place.

Washing

1. Your fabric graphic can be machine washed. Remove any hardware attached to the fabric prior to cleaning. Use MILD soap and cool water. Air dry fabric, dry on frame if frame is available.
2. Fabric must be COMPLETELY dry prior to storing.
3. DO NOT DRY CLEAN

Stain Treatment

1. Treat stain from backside of fabric.
2. Remove as much of debris as possible with a soft bristle brush (do NOT rub too hard)
3. Use a clean, lint-free white cloth. Lightly pat the stain from the outside moving in (to keep stain from spreading)
4. If a cleaning solution is used, rinse the area well with water to ensure NO solution is left on fabric.
5. Most stains can be treated with household fabric stain removers. It is ALWAYS important to test how the solution will react to the fabric. This can be tested by dabbing solution to a small corner of the fabric. Most household cleaners will provide treatment instructions depending on the type of stain.

Wrinkles can be removed from fabric with a cool iron or steamer.

Fabric can be machine washed - use cold water, delicate cycle.

Do NOT bleach fabric

Do NOT tumble dry. Fabric must be air dried on the frame to prevent shrinking.

Melamine Foam Sponge

For light spot and dirt removal we recommend the use of a melamine foam sponge like a "Mr. Clean® Magic Eraser." These can be used dry or with water. Try using the sponge dry to begin with. This will easily remove many simple dirt and dust marks. Wet the sponge with water if the results are not satisfactory using it dry.

Carpet Cleaning Solution

For extra-difficult stains use the melamine foam sponge in conjunction with a carpet cleaning solution such as "Resolve® Carpet Cleaner." Soak the stain with the cleaner and let rest for one minute before rubbing with the sponge. We have found this combination will remove most stains satisfactorily without damaging the fabric.

Stain Remover Pen

Another great way to deal with extra-difficult stains is to use a stain remover pen such as a "Clorox® Bleach Pen" (do not use regular Clorox bleach) or "Tide® to Go" with the melamine foam sponge. Follow the same method as with the carpet cleaner by soaking the stain and letting it rest for about one minute before rubbing with the sponge. This method has also been very successful in removing most stains without damaging the fabric.

Washing Machine

For laundering the whole graphic, machine wash in cold water on gentle cycle with a gentle fabric detergent. Air drying is best, but graphics may be tumble dried with no heat or low heat. Machine drying is also a great way to freshen up your graphic a remove wrinkles.

Bonus

A portable hand held steamer will remove wrinkles.
